

Matt Hayler's  
Workshop on Neurodiversity  
made me question  
who has to adapt:  
the system? other  
people? myself?

What does GenAI  
askforce us to add  
to?

Yet GenAI is Probabilistic  
So how do we trust?

Jack Wilson's  
Session helped  
me think of the  
HUMAN DECISIONS  
behind the machine

Can you TRUST  
those decisions?

I am still a developer  
— without coffee —  
I am still a developer  
— without GenAI —  
As long as I can  
Imagine, I can play  
and I can make!  
Coffee + GenAI  
= MORE  
But what is  
MORE??

GenAI Agents  
DON'T NEED  
COFFEE  
Like I DO  
(Yet)

Coffee, play and living,  
Timothy Liu  
For the UKRI AI4RC EDI-AI

I'm a Game dev -  
But why I make  
Games is because  
I enjoy  
Playing  
Together

Now I research  
how GenAI  
and interactive fooms  
help stress and the  
public play together

BUT I don't create  
alone! sure, the code  
may be done at home,  
but the real creativity  
is done with others -  
Even GenAI comes  
from the work of  
others!  
AI has lots of hidden  
labor that isn't  
visible.  
GenAI is not just  
a system of self.

GenAI gives me extra  
capacity to "do" but  
I am less comfortable  
with how managed  
the process is -  
Once I used  
to sip coffee  
while coding  
Now, I can finish  
a whole cup while  
the agents "work"

"The agent sounded like me"  
At Keith Thompson's  
Probabilistic Poetry  
Workshop, two AI  
Models described me  
"Curious/Experimental/  
Resistant/Builder"  
But neither mentioned  
COFFEE  
Yet I still felt  
recognised

# Print and fold

Coffee, play and living / Timothy Lim

## 1. Print page 1 only.

A4 landscape, single-sided, Actual size / 100%.

Turn off duplex and booklet printing.

## 2. Trim the white border.

Use the corner marks. Keep the complete photograph.

The trimmed sheet is about 277 x 196 mm.

## 3. Crease eight equal panels.

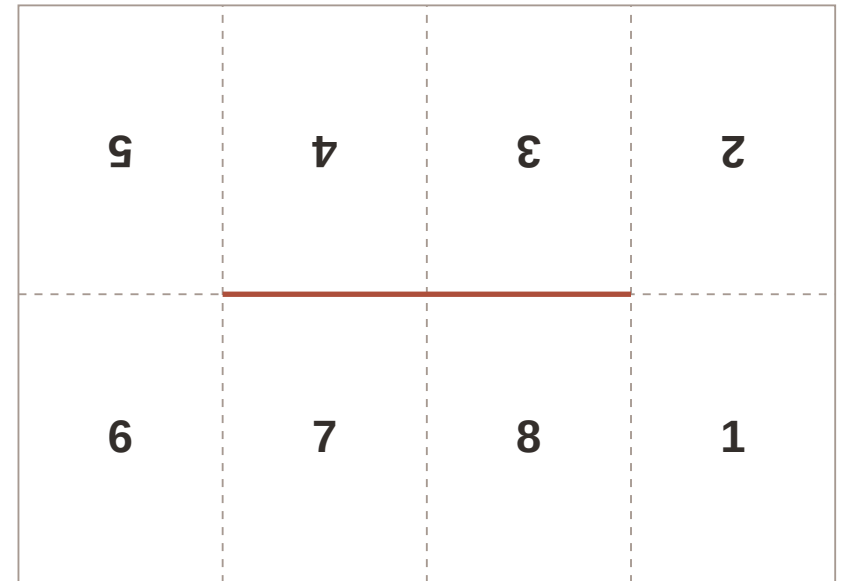

Fold the long edge into quarters and the short edge in half, then unfold. Use the diagram at right.

## 4. Cut the centre slit.

Cut along the middle fold through the two centre panels only. Do not cut through to either outer edge.

## 5. Fold into a book.

Fold lengthways, with the printing on the outside. Push the short ends together so the slit opens into a diamond. Bring the four sections together, with page 1 as the front cover and page 8 at the back.

Dashed lines: fold

**Solid line: cut only this section**

Page 1 = front cover

Page 8 = back cover
